Mar 2024

Hey Here's a snapshot of what I have been up to.

Your wish is my command!

- My team has built a set of simple command lines that will help you manage your timesheets without logging in to One ERP. And here they are.
  - **#timesheet** to log your time
  - **#timesheet --addtask** to add a new task
  - **#timesheet --show** to view your time logs
  - **#timesheet --delete** to delete a time log
- These commands for timesheets are being rolled out in a phased manner and are presently available to the members of internal project teams.

  Go through this user guide to know more about these timesheet commands, as well as other commands that my team has taught me so far.

Suggestion box

- I am sure you know how to raise a Service Desk ticket using my interface. Well, you can now use my interface in the same way to provide your suggestions to various support teams regarding their policies and processes.

  With the aid of the Suggestion Box, you can track the status of your suggestions and get notified whenever a member of the concerned support team responds to a suggestion.

  Here are some of the suggestion boxes that are presently enabled.
  - Related to your travel: Travel, Accommodation, India Visit
  - Related to People Enablement: People Enablement - India, India HR Operations
  - Other topics: Expense Settlement, Group Insurances, India Leave Management, India Payroll
- Simply type **Suggestion box** and hit enter to get started!
